-----

The Open Compute Project Foundation (OCP) is spearheading a radical redesign of data center power architecture to support AI's explosive growth, including the concept of '1 Megawatt...

This requires a much higher voltage DC power distribution solution, where power components and battery backup are outside of the IT rack. We are excited to introduce +/-400 VDC ...

Google outlines new AI data center infrastructure with +/-400 VDC power and liquid cooling to handle 1MW racks and rising thermal loads.

This project is the first project decarbonizing the backup power for Data Centers with a switch from diesel as back-up fuel towards natural gas and later to green hydrogen when available.

The MEGATRON 1MW Battery Energy Storage System (AC Coupled) is an essential component and a critical supporting technology for smart grid and renewable energy (wind and solar).

Battery Energy Storage System (BESS): Pre-designed 1MW/1MWh solution allows the site to operate for one (1) hour on off-grid mode while keeping necessary and critical loads powered up.

Easily upgradable from 500kW to 1MW of energy storage, storing up to 3.8MWh of energy, enough to power an average 3,600 homes for one hour.

Featuring a split PCS and battery cabinet design, it offers 1+N scalability and integrates seamlessly with solar PV, diesel generators, the grid, and utility power.

A recent industry survey reveals 68% of 1MW system buyers now require dual-fuel compatibility. Our solution exceeds this benchmark with tri-fuel switching capability between grid, generators, and ...

# 1MW Data Center Battery Cabinet for Wind Power Generation

They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale ...
