Step 1: Determine Your Average Monthly Kwh Usage
Step 2: Calculate Your Daily Kwh Usage
Step 3: Estimate The Amount of Sunlight Your Solar Panels Will Receive
Step 4: Account For Inefficiencies
Step 5: Full Or Partial Offset?
Step 6: Determine How Many Solar Panels You Need

Most grid-tie homeowners choose to offset 100% of their energy needs with solar. But it is also possible to start with a smaller system for partial offset, and then expand down the line as the budget allows for it. If partial offset is your goal, you can account for that here. For example, let's say you want to start by offsetting half your energy ... See more on [gogreensolar](#)
