New street and outdoor small-cell solutions from Ericsson can be mounted on existing infrastructure. They are fast to install, with a subtle footprint, and secure the 5G experience.

5G micro base stations are small cellular units designed to enhance wireless coverage and capacity. They are typically installed on street furniture, building facades, or other urban...

The following table outlines different types of 5G small cells and their respective features, including deployment scenarios, supported user capacity, power range, and coverage distance.

The 5G-LTE series "MICRO" enclosure delivers the same robust protection as its larger counterparts in a compact design. Engineered to withstand extreme heat, heavy rain, and freezing temperatures, it ...

Hytera's small base station product has an integrated design with small size and easy installation, which can greatly reduce the customer's CAPEX and OPEX. The portfolio is divided into two categories ...

CableFree offers Band 46 5GHz LTE Base Station and Outdoor CPE devices for 4G/LTE operation in Unlicensed 5GHz spectrum, enabling smaller operators and private customers to build LTE without ...

This product has the advantages of low power consumption, small size, convenient engineering construction, and is especially suitable for 5G+ vertical industry applications such as intelligent ...

Experience CableFree's 4G & 5G LTE Small Cell outdoor base stations with software-defined radio for great flexibility, high performance & low operation costs.

Samsung's Compact Macro is an unparalleled solution for rolling out mmWave 5G services. It's an innovative product that integrates the baseband, radio and antenna all together in one small form factor.

A carrier-grade wireless base station for deploying 5G mmWave networks of superior throughput and

5g outdoor micro base station

near-zero latency. Weather-resistant, perfect for outdoor and macro cell scenarios.
