The European solar market slows to 65.5 GW of new installations in 2024, marking just a 4% growth compared to 2023. Explore the challenges and future outlook for solar energy in Europe ...

solar market and power consumer. As part of the record-breaking solar generation volumes achieved in the EU in June 2025, solar reached a 30% share of monthly electricity generation

The EU Market Outlook for Solar Power: 2025 Mid-Year analysis is the first of our reports of its kind. The publication provides a brief market snapshot and outlook for the rest of the year.

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, ...

A new EU-wide analysis shows that rooftop solar photovoltaics could supply around 40% of Europe's electricity by 2050. The analysis provides an open access, high resolution basis for more ...

Wind and solar reached 30% of EU electricity, higher than fossil power (29%) for the first time on record, and up from 20% just five years prior. By 2025 wind and solar generated more power ...

Europe's solar future is not just about installing more panels -- it's about managing solar intelligently: when it's produced, when it's needed, where it's stored, and how it's shared.

Markus Hoehner and Rajan Kalsotra, CEO and Senior Consultant at the Bonn-based EUPD Research, discuss the growth trajectory, challenges and opportunities within the EU solar PV ...

The Europe solar PV market size crossed USD 63.1 billion in 2024 and is set to register at a CAGR of 7.1% from 2025 to 2034, due to the growing focus on green energy and net zero initiatives.

According to the market survey, 2023 was the best year for solar power for 20 of the 27 EU member states, including 14 countries that installed 1 or more GW. The combined installed ...
