Argentina has concluded its first battery energy storage (BESS) tender, awarding 667 MW of projects--well above the 500 MW target--after receiving bids totaling 1,347 MW from 15 ...

This week, the Argentinian government opened bids for the AlmaGBA tender, initiated in February 2025 to procure 500 MW of battery energy storage system (BESS) capacity for critical ...

Argentina has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme.

Argentina has taken a decisive step toward modernizing its power infrastructure, drawing international attention with its first large-scale battery energy storage tender.

The Government awarded the contracts for the "Alma-GBA" bidding process, aimed at incorporating electric energy storage systems in the Buenos Aires Metropolitan Area (AMBA), where ...

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong ...

But here's the kicker - Argentina isn't just building storage, it's mining the key ingredient. With lithium reserves that could power half the planet's EVs, every battery plant doubles as a ...

The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure.

Argentina's first energy storage tender has lured proposals for 1,347 MW of combined capacity, indicating a high investor interest that significantly exceeded the 500-MW target.
