---

Smart energy systems will define the next phase of Australia's clean energy transition At My Energy Group, we see this as an opportunity -- not just to generate clean power, but to help Australians ...

At CSIRO, we are interested in energy storage research on firming renewable energy technologies. Energy supplied by renewable energy technologies, like solar and wind, are variable -- supply ...

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

Australia's energy market hit a turning point in 2025. As rooftop solar growth slowed, battery installations surged to record levels, reshaping how homes and the grid use electricity. This blog explores ...

Located in Queensland's Central Renewable Energy Zone (REZ), the project combines Elements Green's global development expertise with SMA's advanced grid-forming and solar inverter technologies, ...

Plans to build a 100 MW solar farm and 45 MW, two-hour capacity battery energy storage system in the Yass Valley have been given fresh impetus with a New South Wales court dismissing concerns the ...

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while...

Battery storage is now key to Australia's clean energy transition. It stabilizes supply by storing extra renewable energy and delivering it on demand, even when solar or wind output drops.

The Clean Energy Council's bi-annual Rooftop Solar and Storage Report (Jul-Dec 2025), shows more than 183,245 battery units were sold in the second half of 2025 alone - a four-fold increase compared ...
