-----

Glass/Glass modules withstand air and moisture and offer best cell protection, while plastic backsheets of glass/foil modules become porous. The Glass/Glass composite protects solar cells against micro ...

A trend in Austria is the production of transparent glass/glass modules for integration in facades, skylights, winter gardens, or courtyard roofing, but also colored and semitransparent PV modules.

Our photovoltaic solutions can be linked to a laminated safety glass, inside which photovoltaic elements have been integrated. They meet the same standards as laminated safety glass in ...

Our electric glass uses the latest smart glass technology to change glass from transparent to opaque and back again on demand, making it ideal for privacy, shading, and solar control.

Mo - Th 8am to 12am 1pm to 4pm Fr 8am to 1pm

They combine a front glass layer with a backsheet foil, offering an excellent balance of weight, stability, and cost. These modules are highly versatile - suitable for everything from single-family homes to ...

Since 2017, SoliTek has been a leading European manufacturer of state-of-the-art Glass-Glass Bifacial Solar Modules. These modules represent a significant technological advance and set new standards ...

Glass/Glass polly/monocrystalline modules with unique Glass/Glass design and thermo-sealing protection at all perimeter of the module ensuring superior robust protection against UV, humidity, ...

For roofs with higher load-bearing capacity, DAS Kraftwerk offers planning and installation of conventional glass-foil photovoltaic modules. All currently available DAS Energy PV modules can be ...

The Austrian solar glass market stands at a critical inflection point, shaped by the powerful convergence of national climate ambitions, technological advancement, and evolving energy security ...
