Is Thailand a good place to export electric truck products?

The electric truck sector is still developing in Thailand and Thailand's battery manufacturers lack advanced technology for upstream production at a cellular level. This presents a great opportunity for exporters of advanced upstream electric vehicle products and energy storage systems.

How many new energy vehicles are there in Thailand?

According to data from the Thai Ministry of Transport and the Industrial Federation, the number of registered new energy vehicles in Thailand is expected to surpass 200,000 units by the end of 2024, with total sales in 2025 projected to exceed 120,000 units, representing an annual growth of over 50%.

How can Thailand meet EV truck demand?

Thailand seeks advanced upstream electric vehicle products and energy storage systems to meet surging EV truck demand.

What is the NEV & charging station industry in Thailand?

The NEV and charging station industry in Thailand is rapidly evolving, with the following key segments: Passenger Vehicles: Compact cars and SUVs that cater to urban commuting and family travel. Compact cars focus on affordability, while SUVs are popular due to their spaciousness and versatility.
