Africa Finance Corporation and PPP Cabeolica have inaugurated 13.5MW of wind generation and 26MWh of battery storage in Cape Verde.

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. [pdf]

Next-generation battery management systems maintain optimal performance with 50% less energy loss, extending battery lifespan to 20+ years. Standardized plug-and-play designs have reduced ...

While you obsess over smartphone battery life, Cape Verde is solving the ultimate power puzzle: storing ocean winds and Saharan sunbeams. The archipelago's 2030 goal of 100% renewable energy ...

A renewable energy mini-grid system has been inaugurated in Cabo Verde that will supply electricity to hundreds of residents living on the archipelago off of West Africa.

An effective energy storage, such as Battery Energy Storage Systems (BESS), is able to bring to the network many advantages, not only in power quality applications that increase network security but ...

You know, lithium-ion batteries powering Cape Verde's 82 MW solar farms have a 7-15 year lifespan. By 2030, over 2,400 metric tons of battery waste could accumulate across the islands - enough to fill 15 ...

In a move that has effectively put the islands on the map in the latest projects, Cape Verde massively boosted its wind power and battery storage, pushing renewables close to one-third ...
