Silent Type Generators in Canada Quiet, weatherproof, and built for industrial & commercial duty. Our silent type (low-noise) generators are engineered with sound-attenuated canopies and optimized ...

In noisy urban environments, Voltgent's super silent generators provide reliable, quiet power for homes, hospitals, events, and more. Designed to minimize sound without sacrificing ...

Microgreen solutions provide reliable power and energy storage for off-grid regular loads, grid-support cases and emergency back-up, with switchable energy input from renewable energy, a grid ...

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

Since 2014, SRC's Hybrid Energy Containers (HEC) have delivered custom decentralized energy solutions, delivering a combination of conventional and renewable power generation along ...

They are very portable, easy to store and can be deployed quickly in times of emergencies as back up power or on off-grid adventures. Not only does this focus on a smaller ...

Whether you need an open-frame generator for easy access, a silent soundproof enclosure for noise-sensitive areas, or a fully containerized system for transportable projects, we deliver certified power ...

Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas.

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments ...

Canadian Silent Container Power Generation

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability ...
