One thing you can do to help you protect your generator is to purchase a special cover. Here is the cover that I recommend. With it, you can operate your generator while protecting it at the ...

Why You Shouldn't Run A Portable Generator During The Rain Portable Generators Can Be Stored--But Never Used--Indoors. Are There Generators That Work in The Rain? Portable generators should not be used indoors, even during a power outage. While the purpose of a generator is to create electricity that can be used to power your electrical devices, lights, and appliances, in order to generate that electricity, a portable generator must burn a fuel source, like propane, gasoline, or diesel. When these fuels are ... See more on bobvila
