How did antidumping and countervailing policies affect the Chinese photovoltaic industry?

Antidumping and countervailing policies from the EU and the USA significantly reduced the export volume and number of new entrants in the Chinese photovoltaic industry. Despite initial setbacks, both export volume and new entrants experienced a "V"-shaped rebound, with new firms rebounding faster and more significantly.

Does antidumping and countervailing policies affect PV patent applications in China?

Moreover, after the implementation of antidumping and countervailing policies by the EU and the USA, there was no significant decrease in the number of PV-related patent applications compared with non-PV-related patents in China, indicating that these trade barriers did not hinder innovation, research or development in the Chinese PV industry.

What is the EU-China solar panel dispute?

ling the EU-China Solar Panel Dispute Patrice Bougette* and Christophe Charlier** abstract The paper analyzes the interactions between trade and renewable energy policies based on the EU-China solar panel dispute which is the most significant antidumping (AD) complaint in Europe. We build a price competition duopoly

What is the most significant antidumping complaint in Europe?

China solar panel dispute which is the most significant antidumping (AD) complaint in Europe. We build a price competition duopoly model with differentiated products and intra-industry trade in photovoltaic (PV) equipment. We show that an optimal antidumping duty always increases with the feed-in tariff (FIT) program set in the home country. An a

The paper analyzes the interactions between trade and renewable energy policies based on the EU-China solar panel dispute which is the most significant antidumping (AD) complaint in Europe. ...

Consolidated text: Commission Implementing Regulation (EU) 2017/367 of 1 March 2017 imposing a definitive anti-dumping duty on imports of crystalline silicon photovoltaic modules and key ...

EU initiates anti-dumping investigation on solar panel imports from China nnEuropean Commis

Commission Implementing Regulation (EU) 2018/1017 of 18 July 2018 amending Implementing Regulations (EU) 2017/366 and (EU) 2017/367 imposing definitive countervailing and anti-dumping ...

The Road Ahead: What 2030 Looks Like for PV Bracket Suppliers As we approach Q4 2024, manufacturers face a make-or-break moment. The EU's REPowerEU plan aims to double ...

The increasing trade barriers imposed by the EU and the USA on China have created a challenging environment for the growth of Chinese emerging and high-tech industries. This paper, ...

About EU photovoltaic bracket anti-dumping As the photovoltaic (PV) industry continues to evolve, advancements in EU photovoltaic bracket anti-dumping have become critical to optimizing the ...

In its study, Prognos sets forth the effect that anti-dumping and / or countervailing duties would have on the demand for solar installations and, as a consequence, on employment and value ...

The EU's Green Deal Industrial Plan must make sure that the solar supply chain is de-risked and manufacturing along the whole supply chain is re-shored to the EU. However, launching an anti ...

amending Implementing Regulation (EU) 2017/366 and Implementing Regulation (EU) 2017/367 imposing definitive countervailing and anti-dumping duties on imports of crystalline silicon ...
