-----

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and ...

The MIT-GE Vernova Climate and Energy Alliance, a five-year collaboration between MIT and GE Vernova, aims to accelerate the energy transition and scale new ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

With abundant hydropower resources and increasing solar/wind investments, Tajikistan aims to stabilize its grid using battery energy storage systems (BESS). The government's 2023 National Energy ...

Making clean energy investments more successful Tools for forecasting and modeling technological improvements and the impacts of policy decisions can result in more ...

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the ...

According to the Deputy Minister of Energy and Water Resources of Tajikistan Manouchehr Safarzoda, the

document marks a major step toward strengthening national energy ...

While battery prices are falling, system design remains critical. EK SOLAR's engineering team has deployed 120+ storage systems across Central Asia, specializing in:

However, Tajikistan's energy sector is prone to supply shocks, due to seasonal shortages. Energy policy focuses on providing uninterrupted energy access to all users while improving regional co-operation ...

Tajikistan's geographic proximity to some of the world's fastest-growing energy markets means that investing in developing its hydropower potential can contribute to regional energy security and the ...

UAE-based renewable energy company Masdar has expanded the scale of an agreement with the government of Uzbekistan to develop battery energy storage systems (BESS).

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy ...

This International Energy Agency (IEA) energy sector review of Tajikistan was conducted under the auspices of the EU4Energy programme, which is being implemented by the IEA and the European ...
