Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Where can solar power be found in Georgia?

Most of the potential sites identified for renewables are located in the central, southern, southwestern and southeastern part of Georgia and are alongside transmission and road networks. The eastern part of the country was found to be particularly favorable for solar.

Does Georgia have a potential for solar?

The International Renewable Energy Agency (IRENA) says Georgia holds vast potential for solar, with most prime sites for deployment concentrated in the country's east, based on a recent zoning assessment.
