What is a greenlinx battery?

Greenlinx are the UK's first battery to use High Power Density (HPD) Lithium Cells, which can utilise 100% of the battery capacity (other lithium batteries can only use 90%). This is a battery unit that can easily be retrofitted into an existing solar panel system, or be a part of the design from the initial planning. So it is a flexible system.

How does greenlinx harnitek work?

Greenlinx Harnitek uses HPD lithium to achieve market leading charge and discharge levels. Smaller than other batteries this great looking battery has inbuilt modem to allow single batteries to be monitored online. Long and short cables provided with every unit, just plug and play set up for the most efficient battery we have ever distributed.

Is greenlinx a flexible system?

So it is a flexible system. Greenlinx sells batteries with a capacity of 3.2 kWh per unit. It is easy to link multiple batteries together to obtain the amount of battery storage needed. For example, if the system requires 12.8 kWh of storage, then four batteries will have to be purchased.

What is a greenlinx 3200 HPD battery?

The Greenlinx 3200 HPD battery offers power, quality, and robust performance with online monitoring to ensure that this is one of the premier products in the residential energy storage market. This BESS unit is also easy to install: it can be floor-mounted or fixed to a wall.

The GoodWe Lynx F G2 Series high-voltage battery provides the ideal modular energy storage solution, when combined with the compatible GoodWe EH and ET series inverters .
