This ambitious initiative includes 1,280 solar power generation arrays and four 220kV substations--the largest of their kind in China. This project is designed to deliver robust renewable ...

Last month, users in Beijing started receiving solar and wind power generated in the northwestern province of Gansu after the energy was delivered via extra-high-voltage transmission ...

Huasun Energy marks its fifth anniversary in July 2025 as the world's leading manufacturer of heterojunction solar products.

Link copied!Copy failed! The 1,879-acre project in Xinjiang features 1,280 solar arrays, four substations, and integrates energy generation with ecological restoration. (Image Source: Huasun ...

LONGi Hi-MO 9 modules outperform TOPCon & HJT in power generation Solar PV major LONGi has released empirical data on its Hi-MO 9 module, based on its second-generation BC ...

Huasun Energy has entered into a strategic cooperation framework agreement with Xinjiang Silk Road New Energy Co., Ltd (Xinjiang Silk Road), establishing a long-term partnership ...

China is already revving up the transition to green energy. Official data released this week showed that the installed capacity of solar power came in at approximately 750 million kilowatts ...

The world's largest single-site heterojunction (HJT) solar project -- the 4 GW Ruoqiang Photovoltaic (PV) Project in Xinjiang, China -- has successfully connected to the grid. As a key ...
