The Gorman battery system, with an installed capacity of 50 MW, is our world's first commercial-scale battery system and the first in Ireland. This project is part of our commitment to promoting battery ...

Today's conference heard from a range of stakeholders across the renewable sector, discussing the potential role of energy storage in the Irish energy transition, and the rapidly emerging ...

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

"This would increase Ireland's energy storage capacity almost eightfold - enough to power every home in Ireland twice over on a still, cloudy day," the report states.

With a target of 80% renewable electricity from intermittent sources on our grid by 2030, Ireland will require a significant amount of energy storage in the years to come.

Ireland could host Europe's first large-scale, iron-air project southwest of Buncrana town in Donegal County. The 10 MW facility proposed by FuturEnergy Ireland will be capable of storing 1...

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air battery facility, a new technology that promises to store...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in

# Ireland gravity energy storage

Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...
