Owner Vistra Energy has announced the completion of work to expand its Moss Landing Energy Storage Facility in California, the world's largest lithium battery energy storage system (BESS) asset.

Swedish investment firm Niam and Estonian developer Evecon have formed a partnership to implement solar energy and energy storage projects in Latvia. Under this collaboration, a total capacity of 84 ...

As the photovoltaic (PV) industry continues to evolve, advancements in kiribati energy storage power station grid connection and operation project have become critical to optimizing the utilization of ...

Completed in Q1 2025, this 3.5MW/14MWh facility combines lithium-ion batteries with AI-driven energy management. Wait, no - actually, it's using a hybrid system.

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage system, ...

The resulting Kiribati Integrated Energy Roadmap (KIER) highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective.

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage ...

Discover how advanced battery storage systems are transforming energy resilience in Kiribati and similar island communities. Learn about tailored solutions addressing unique geographical ...

Welcome to South Tarawa, Kiribati - ground zero for climate change and the unexpected testing ground for

one of the Pacific"s most innovative energy storage projects.
