Does Longi have a back-contact solar module?

Longi has released a back-contact solar module with 24.8% efficiency, featuring a power output of up to 670 W and a temperature coefficient of -0.26% per degree Celsius. Longi has launched its Hi-MO X10 anti-dust solar panel at the China (Jinan) International Solar Energy Utilization Conference.

Are Longi X10 back-contact solar modules reliable?

At the recent TaiyangNews Reliable PV Module Design Conference 2024, Dante Zeng, Product Marketing Manager at LONGi Solar, discussed the main features, including anti-dust accumulation, of the company's Hi-MO X10 series back-contact modules designed for DG applications (see Birth To Earth: LONGi Hi-MO X10 Module's Full Lifecycle Reliability).

Does Longi X10 have anti-dust feature?

LONGi unveiled its upgraded version of the Hi-MO X10 solar modules with anti-dust feature at an event in China. (Photo Credit: LONGi)

How does Longi anti-dust technology work?

Superimposed on LONGi's first anti-dust technology in the industry, the product features improved frame design that prevents dust accumulation more effectively. The theoretical power generation per unit area with this latest design is more than 10% higher than that of conventional TOPCon components, claims the manufacturer.

The new module series uses Longi's second-generation hybrid passivated back contact (HPBC 2.0) cell technology. It includes seven models, all with a uniform half-cell (6x215.24) design and dimensions of ...

LONGi has unveiled its latest product, Hi-MO X10 Anti-Dust Pro, during its participation at the World Future Energy Summit (WFES) 2026, reaffirming its ongoing commitment to developing ...

Longi has released a back-contact solar module with 24.8% efficiency, featuring a power output of up to 670 W and a temperature coefficient of -0.26% per degree Celsius.

The power generation gain of the Hi-Mo 5 Anti-Dust solar module will vary by region and month due to factors like dust accumulation and rainfall, but LONGi's long-term outdoor testing (seen ...

Longi photovoltaic panel dust prevention

This article digs into the role of anti-dust tech for modules. It walks through dust accumulation and its impact on PV performance. It also looks at a few key dust accumulation scenarios and details how ...

The introduction of the Longi "anti-dust" module is a significant development in the solar industry, addressing one of the major challenges faced by solar energy producers. Dust ...

On October 8th, LONGi announced the release of the LONGi Distributed Hi-MO X6 high-efficiency anti-dust solar panel, which is the world's first anti-dust PV product.

Chinese solar PV manufacturer LONGi has launched a new version of its Hi-MO X10 solar module with improved field performance attributes, based on its proprietary Hybrid Passivated Back ...

LONGi showcased its latest Hi-MO X10 Anti-Dust Pro series BC module for desert-based applications. This module has a nano-ceramic-coated PV glass and short-side edge frames without ...

At the World Future Energy Summit 2026, LONGi unveiled the Hi-MO X10 Anti-Dust Pro PV module, highlighting design features intended for arid and high-soiling environments.
