The control cabinet inverter features vector control with an overload reserve of 200%. This makes it suitable for controlling geared motors in heavy-duty applications or lifting systems. Its ...

Discover how a grid-connected photovoltaic inverter and battery system enhances telecom cabinet efficiency, reduces costs, and supports eco-friendly operations.

The NORDAC PRO SK 500P control cabinet inverters cover motor powers from 0.25 to 22 kW and feature ultimate levels of connectivity, functionality and versatility

The control cabinet inverter can implement a wide range of industry-specific drive applications. It also has a vector regulation with an overload reserve of 200% making it suitable to ...

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

Our advanced energy storage systems are designed to integrate seamlessly with our solar inverters, ensuring optimal performance and reliability. Our storage solutions are available in various capacities ...

We have developed the NORDAC PRO family of frequency inverters specifically for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors ...

An integrated and durable power solution designed for telecom outdoor applications, supporting multiple power input sources such as grid, solar, generator, and battery. Engineered for high reliability and ...

Built with IP55-rated protection, it features integrated cooling, optional battery compartments, and solar controller support. This cabinet ensures continuous AC or DC power conversion and safe operation ...

Nordic solar telecom integrated cabinet inverter

This innovative inverter offers exceptional yield, seamless integration with energy storage systems, robust reliability, and effortless operation and maintenance.
