Against this background, the objective of this thesis is to investigate how these transnational actors operate and influence the transition to solar PV in East Africa, focusing specifically on off-grid and ...

In this context, this paper critically analyses the diverse strategies and advanced trends for acquiring grid support services from solar photovoltaic power plants.

They develop support policies, pricing mechanisms (such as feed-in tariffs), and regulations that govern the development of solar installations. Their action aims to create a favourable environment for ...

The Snapshot of Global PV report is compiled from the preliminary market development information provided annually by all countries participating in the IEA PVPS Programme. Published in April, the ...

This article examines the pivotal roles played by different actors throughout the various stages of BIPV development, from research and design to implementation, underscoring the importance of a holistic ...

In this article, you will learn how to use a simple four-step process to identify the most important stakeholders for a solar PV project, based on their power, interest, influence, and attitude.

Because there are a wide array of ways that commercial solar projects can be financed with a variety of different actors, we'll delve into financing in greater depth in a subsequent article in this series.

In this research, we draw on the mapping of 198 local organizations and 34 semi-structured interviews conducted after deploying a pilot energy support service in Setúbal, Portugal.

Many jobs and professions have emerged from the Solar PV industry since its inception, with research and development institutions playing a foundational role in investigating and leading innovative ...

Learn how the DOE Loan Programs Office (LPO) is supporting U.S. solar PV manufacturing projects. In this

Photovoltaic support actors are

post, I will explore how the DOE (Department of Energy) Loan ...
