Eligible projects were in line for up to EUR30 million and allowed to be developed both at the transmission and distribution levels. The tender was launched in August 2024 and preliminary results...

Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ability to dispatch renewable energy to the grid when it needs it most and ...

The Portuguese Environment Agency's Participa portal currently features two big renewables-plus-battery project proposals.

A high-capacity, 2 megawatt-hour battery energy storage system integrated into a standard 40ft container. Designed for large-scale renewable integration, peak shaving, and grid stabilization, ...

The collaboration between Galp and Powin has begun the installation of a large-scale battery energy storage system in Alcoutim, a small town located in the sunny Algarve region of ...

With solar farms sprawling across Alentejo and wind turbines dancing off the Atlantic coast, Portugal's secret sauce lies in its cutting-edge energy storage solutions.

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

As renewable energy adoption accelerates globally, Lisbon emerges as a strategic hub for innovative containerized energy storage systems. This article explores how modular energy storage solutions ...

On 17 December in Lisbon, Hyperion Renewables announced the launch of battery storage projects in Estremoz and Évora, developed in partnership with Omexom Portugal and Saft, a subsidiary of ...

Portuguese containerized energy storage vehicle

This study provides a compelling answer: energy storage is not only a technical necessity -- it is a strategic opportunity. It aims to guide Portugal in defining its energy storage roadmap, offering ...
