What are the government's SOE reforms?

The focus of the government's SOE reforms is on increasing the efficiency of the state sector by introducing new ways for SOEs to innovate and grow. The reforms are intended to develop industries that the government views as essential to its future economic plans.

When did solar photovoltaic systems start?

4.1. Initial development and domestic demand formation (2000-2010) The global development of solar photovoltaic (PV) systems commenced in 2000 with the enactment of the German Renewable Energy Law (Erneuerbare Energien Gesetz, EEG).

How did industrial policies change during the era of photovoltaic power generation?

Consequently, policies shifted towards industrial adjustments and the establishment of standards. Keywords such as "PV power generation," "distributed photovoltaics," "standard," "supervision," and "priority in feedback to the grid" gained prominence during this stage.

Why does China need a stable policy framework for solar PV market development?

The central government has placed significant emphasis on renewable energy, particularly solar PV technology. China's rapidly growing PV industry greatly benefited from the domestic supportive policies. Hence, maintaining stable policy framework and expectations is pivotal for market development.
