What is rooftop solar & how does it work?

Rooftop solar is exactly what it sounds like-- solar panels installed on rooftops that harness sunlight to generate electricity. Businesses can produce energy instead of relying on traditional power grids, reducing costs and ensuring power stability. On-Grid Solar System: Connected to the main electricity grid.

What are the benefits of rooftop solar?

One of the most significant benefits of Rooftop Solar is the drastic reduction in electricity costs. Factories consume large amounts of energy daily, and relying on grid power can result in substantial monthly bills. With solar, factories can generate their own electricity and use it directly.

Is rooftop solar a good investment?

The numbers don't lie--rooftop solar is one of the smartest investments for businesses today. With huge savings, government incentives, and a strong ROI, switching to solar isn't just a good idea--it's a game-changer.

How much does a rooftop solar system cost in India?

Example: A 50 kW rooftop solar system under CAPEX costs around INR25-30 lakh in India. If a business saves INR5 lakh per year on electricity, the system pays for itself in 5-6 years, and the remaining 20 years of energy is nearly free. 2.
