The project supports Tunisia in expanding renewable energy by enabling private investment in solar and wind power and modernising the electricity grid.

The TEREK program is expected to support Tunisia in achieving its goals to mobilize US\$2.8 billion in private investment to add 2.8 gigawatts of new solar and wind capacity by 2028, ...

Anglo-Tunisian group SoleCrypt announced plans for a 60 MW PV plant in Tozeur, part of a broader initiative to connect eventually to the Medusa submarine cable, enhancing Tunisia's energy...

Tunisia's industry, mines and energy minister Fatima Chiboub signed the deals this week with representatives from Germany's Qair Group, Norway's Scatec, Voltalia of France and Aeolus of ...

Qair is an independent renewable energy company developing, financing, building, and operating solar, wind, waste-to-energy, storage and green hydrogen production assets.

The MIGA guarantee will enable the development, financing, construction, operation and maintenance of 100 MW grid-connected solar photovoltaic power plant on a build-own-and-operate ...

This initiative is essential to reduce the country's dependence on foreign energy sources and reduce its energy deficit. Three of the projects, each with a capacity of 100 MW, are being...

The World Bank, in collaboration with Tunisia's Ministry of Industry, Mines, and Energy (MIME), has announced the need for a technical study for a substantial 350-400 MWp solar project ...

TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export. Each export project consists of three components:

Tunisian investment group solar energy storage

With solar irradiation levels hitting 5.3 kWh/m²/day and wind speeds reaching 9 m/s in coastal areas, this North African nation could power half the Mediterranean - if it can store that energy effectively. Let's ...
