What is a Arimon backup battery cabinet?

Arimon designs and manufactures custom uninterruptible power supply(UPS) backup battery cabinets, battery racks and accessories for the military and commercial OEMs serving applications including: Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries.

How are ups and MBC installed?

Each cabinet in the UPS system is placed in its final installation location. The UPS and MBC must be installed on a level floor suitable for computer or electronic equipment. The MBC cabinet is bolted to the floor for permanent installations. All conduits and cables are properly routed to the MBC. All power cables are properly sized and terminated.

What happens if a UPS is in bypass mode?

Turn on the protected equipment (loads). When the UPS is in Bypass mode, power is present inside the UPS cabinet. Only trained personnel familiar with the operation of this equipment should transfer loads. Failure to follow this transfer sequence may cause loss of power to loads or overload protection devices to activate.

Our series of maintenance bypass panels and free-standing cabinets allow the end-user to safely isolate the UPS from utility power. Perform regular service and repairs while the critical load stays intact.
