The high-voltage side is 10kV, and the low-voltage side is 380V. The 6MW/24MWh energy storage system is connected to the high-voltage bus at the user side by one parallel point.

The article also highlights voltage support, demonstrating how strategically placed storage systems can replace traditional reactive power generation and improve grid reliability.

Given the above, this paper proposes a hierarchical power supply strategy for premium power parks (PPPs) based on the coordination of UESSs and dynamic voltage restorers (DVR). Firstly, the...
