OverviewPotentialGovernment PoliciesPhotovoltaicsResearch and developmentUzbekistan has great potential for solar energy due to its high levels of solar radiation and large areas of barren land that can be used for solar power plants. The country receives an average of around 300 sunny days per year, making it an ideal location for solar power generation.

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

This includes 9 thermal power plants, 9 photovoltaic power plants and 7 wind power plants, with a total investment of 10.148 billion US dollars and a total installed capacity of 11,954 ...

Uzbekistan's solar and wind power plants have produced 5 bn kWh of electricity so far in 2025, saving 1.5 bn cubic metres of gas. The latest figures show a significant increase from previous ...

The solar power plant, which will be constructed in the Alat district of the Bukhara region, is projected to cut over 327,000 metric tons of CO2 emissions annually by generating more than 585 ...

Developed by the international renewable energy company Voltalia, this 126-megawatt project is a cornerstone of Uzbekistan's strategy to expand its green energy capacity. The Sarimay ...

Located in the Dedza district of Malawi near the town of Golomoti, the 20MWac solar PV and 5MW/10MWh energy storage project is set to become a leading project in sub-Saharan Africa in ...

Uzbekistan's Samarkand and Jizzakh solar power plants have commenced operations, marking a milestone in the nation's energy transition. The two plants, boasting a combined installed ...

After discussing the possible barriers to the deployment of solar energy in Uzbekistan, the report presents a

roadmap for solar energy by 2030. It provides examples of international best practices in ...

Uzbekistan has made a positive effort toward that end, including by setting clear targets and reforming the energy sector and has been progressing toward achieving the solar power capacity target of 4 ...
