## What brand of voltage stabilizer does the base station use

The static voltage stabilizer monitors the incoming voltage from the utility power supply continuously and makes real-time adjustments to maintain a stable output voltage.

Relay Type Voltage Stabilizer Servo Voltage Stabilizer Static Voltage Stabilizer These are simply called servo-based stabilizers (working on a servomechanism, also known as negative feedback) and, as the name suggests, use a servo motor to achieve voltage correction. These are primarily used for high output voltage accuracy, typically  $\pm 1\%$ , with input voltage variations up to  $\pm 50\%$ . The figure below shows the internal circuit of t...
