What is solar energy in Armenia?

Solar energy in Armenia is an important source of renewable energy, and its technologies are broadly characterized as active solar or passive solar, depending on how they capture and distribute solar energy or convert it into solar power.

Who makes solar panels in Armenia?

Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel. In Solaron Company merged a team of highly qualified professionals with many years of experience in the business organization from scratch.

Where is Solaron available in Armenia?

Solaron's services are available throughout all regions of Armenia. Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel.

What is Armenia's largest solar power plant?

The 200-megawatt plant named Ayg-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

"Yerevan Park Group" LLC - 795,825 kWh. Solara guarantees the high quality of solar panels

birth ...

Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by ...

Scaling Solar PV Panel Production for 5.4 MW Capacity and Averting 2,543 Tons of CO2 Emissions Annually. In the sun-kissed city of Yerevan, back in 2019, a visionary enterprise emerged - the birth ...

YEREVAN, April 9. /ARKA/. Armenia and the UAE have agreed to begin the construction of the industrial-scale photovoltaic solar power plant "Ayg-1" in Armenia in early 2026. The ...

Our range of services includes: customer demand assessment, solar power plant planning and design, Solar electric station installation, warranty and post-warranty service.

The share of solar PV power generation in the overall electricity mix has surged from 0.07 percent in 2018 to 8.5 percent in 2024. These figures exclude self-consumption by autonomous ...

Explore the potential for solar panel manufacturing in Armenia. Our 2025 analysis covers labor costs, supply chain challenges, and key opportunities for investors.

Solar energy - light and heat radiated from the sun, which is used by a number of constantly developing technologies, such as solar heating, photovoltaics, solar architecture and ...

Maximise annual solar PV output in Yerevan, Armenia, by tilting solar panels 34degrees South. Yerevan, Armenia (latitude 40.1817, longitude 44.5099) is a suitable location for generating solar ...

The government's ambitious renewable energy goals, often featured in Armenia renewable energy news, create a compelling opportunity for solar panel manufacturing. As of early ...
